SHOWING THE CHAMPION BARROW in the Market Hog Show Wednesday was C Warren Leininger, Denver R2 The 205 pound Spotted Poland China Barrow topped the field of 298 entries to become the first Spotted Poland China in the four-year history of the show to win the Grand Championship. The show is an annual activity of the Lancaster County Swine Producers Association.

L F. Photo

Leininger Barrow Tops County Market Hog Show

A spotted Poland China Wednesday was named Grand Champion barrow for the first time in the four-year history of the Lancaster County Swine Producers annual show and sale

The 205 pound "Spot' was from the herd of C Warren Leininger Denver R2, and was one of the three Spotted Poland China hogs in the reserve championship trio

Grand Champion pen of three went to Masonic Home Farms for three head of Berkshires averaging 193 pounds

A lot of trim 213 pound landrace crosses captured the pen-of-ten championship for Stauffer Homestead Farm, East Earl R1 Reserve Championship went to Norman Kolb 355 Pitney Road, Lancaster, exhibitor of the Championship barrow last year

It was the first time in the history of the show that a Spotted Poland China captured any of the top spots "I was surprised Leininger said after the judging "I thought the judge would go to one of the white hogs or one of the crosses"

The champion barrow was one of a litter of 10 sired by a boar out of Iowa "The grandsire of this barrow was Big Ben, an All American Sire and a Premier Sire of the state of Iowa" Big Ben was also named Grand Champion Sire over all breeds at the Austin (Minn) Barrow Show.

Leininger said he did not keep any of the boar pigs from

Tobacco Market Program Backed By Farm Group

Machinery for developing a marketing program for Lancaster County tobacco was set in motion Thursday night at a meeting of the county Farmers Association

The nearly 75 members present at a meeting in the Lancaster County Poultry Center instructed their board of directors, by a unanimous vote, to study plans for implementing a marketing program for type 41 cigar filler tobacco

In the first such attempt since the organization of the Lancaster County Tobacco Cooperative, the farmers association plans, while by no means concrete at this time, seeks to have the farmer impose controls upon himself

"It is not so much controls in themselves that we disapprove," said Harold Rohrer Lancaster R7, president of the county group, "But we are concerned that the farmer has control of the program"

While no preliminary work on a program has been undertaken, and very little actual study has been given the specific program, consensus at the meeting was that a program similar to the Pennsylvania Farmers Association's tomato growers program would evolve

Tomato growers, organized under the newly-formed Agricultural Marketing Association, a marketing affiliate of PFA and in operation two years, sign a contract with the association under which all tomatoes on the farm are grown The PFA then acts as the bargaining agent for the farmer

Under terms of the contract, which is binding in a court of law the grower is fined up to 25 per cent of his crop if he does not carry out the stipulations of the agreement

If a tobacco program is formulated, Rohrer said, it will have to have "teeth" in it or it will not work This is not to say that a tobacco program would necessarily be patterned closely after the tomato program, however

Rohrer has called a meeting of the board of directors for next Tuesday night to appoint a study committee

Pest Control And Spray Meeting Scheduled For County Next Week

new Growing season is just ahead and pest control will be an important part of farm work Arnold Lueck, assistant county agent, said this week

Looking forward to this important part of farm activity the Lancaster County Extension Service has scheduled a spray meeting next week for farmers in the area

The program, scheduled to begin at 9 30 a m on Wednesday March 21 at the Lancaster Poultry Center, Roseville Road and 230 By-pass, will feature extension specialists from the Pennsylvania State University

The three main topics under discussion will be the control of plant diseases, insects and weeds A fourth topic will be the proper adjustment and operation of spraying equipment

County Youths At Conference On Youthpower

Teenagers can solve many of their own problems best Seventy students from 29 counties participating in the Pennsylvania Youthpower Congress recently indicated they understand their own problems as a group better than most adults think

The problem of nutrition and eating habits is one which the students think they can solve best The group, meeting at the Chalet Restaurant, Dillsburg, were interviewed by a team of judges to determine their understanding of good diets in relation to physical mental, and moral strength A team of doctors scored them on physical fitness and appearance They participated in group discussions regarding the problems of youth and what adults and youth themselves can do about them

Grain Program Signs Up 151 County Farmers

A total of 151 county grain farmers have signed up for the 1962 Feed Grains Program, according to Dorothy Neel, Lancaster County Agricultural Stabilization and Conservation office manager

Miss Neel said advance payments of $42,288 07 have been made on the diversion of 2 165 acres of corn

Enrollment which ends March 30, is considerably less

New Holland reported a steady market at the March 12 auction of horses, ponies and mules A run of 215 head saw mules continuing to find a ready market

Mules by the pair brought $300-350 while single mules made $140-210 Mare ponies brought $75-110, geldings $40-85 Riding horses were $130-300 and driving horses $130-215 Killers were 8½-9½ cents per pound

SHEEP 27 Few Utility to Choice wooled slaughter ewes 3 00-7 00

At the March 14 sale of dairy cattle 156 cows, 13 bulls and 20 heifers met a steady market Fresh Holsteins brought $300-410, Guernseys were $175-225 and other breeds brought $175-265. Stock bulls brought $110-190 and stock heifers made $75-175

At the March 12 sale of hogs, 427 head crossed the block at steady prices Retail hogs to local butchers brought 18 5 to 20 with a few odd head as high as 22 75 One to three grade hogs to packers made 17 5 to 18 Fat hogs weighing over 240 lbs. sold at 16.

The 109 calves on Monday's sale sold at steady prices with choice and prime at 38-43, good and low choice 33-38, standard and low good 24-33 and cull and common 18-24

Plan Hay Drying

A mow hay drier can't be installed overnight That's why Joseph McCurdy, Penn State extension agricultural engineer, says the time to plan for the installation is when the having season is still a few months away A barn hay drier helps beat the weather, cuts down leaf losses, and increases total digestible nutrients

---

The happiness of your life depends upon the quality of your thoughts

All

RED ROSE

dairy feeds

now

contain

added

vitamin A

There is convincing evidence among dairymen today that cows need vitamin A — to promote general over-all better health Cows fed rations fortified with a higher concentration of vitamin A stay at peak production longer . . . are in better condition for calving . . haircoats are glossier and young stock grow faster and take their place in the milking line earlier.

For better dairying — feed Red Rose Dairy Feeds with added vitamin A. We carry the complete line.

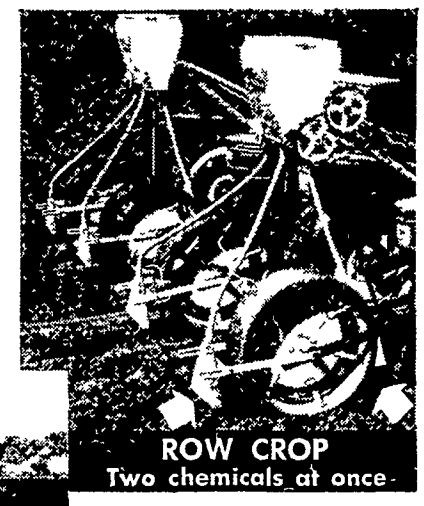
Kill Weeds, Insects with Broadcast or Row Crop Granular Chemical Applicators



NEW!

Noble

GRANULAR APPLICATORS Boost Yields of Corn, Soybeans, Vegetable Crops

Switch to granular chemicals! Completely pre-mixed, no water to haul Farmer-proved Noble row crop applicators fit most all planters, listers, seeders (2, 3, 4, 6-row). Let you kill weeds, insects while planting. Shown is Noble Simul-Caster, spreads both insecticides and herbicides with one pass over the row Divided hopper holds 16 lbs insecticide, 32 lbs herbicide Application rate from 8 oz per acre to 50 lbs To apply only one granular chemical at a time, Noble Single-Unit Applicator is economical buy, applies insecticide or herbicide.

Newest broadcast applicator is Noble Chemi-Caster Applies either granular insecticides or herbicides with unheard-of precision and uniformity Model 7 bands 7 ft , Model 14, 14 ft Rate is from 2 lbs per acre to 50 lbs Mounted on tractor's three-point drawbar, finger-tip control lowers applicators for close ground coverage when used over pre-emergence of crops, or raises to clear tops of post-emergence of crops Tractor PTO-driven allows full maneuverability.

NOBLE APPLICATORS 4 YEARS IN THE FIELD

- Powr Feed spreads chemicals evenly, on level ground, hillsides.
- Micro-Tight Shut-Off prevents leaking, waste . . . even when refilling hoppers
- Perfect-Pattern Spreader hugs ground, prevents drift Assures exact placement of granules Bands 7" or 14" pattern from one tube
- Multi Mount, heavy-duty universal mounting brackets, stabilizer braces fit most planters, listers, seeders. Rigid, can't work loose.

Broilers Lose Strength

Broilers lost a little of their strength on the Lancaster Poultry Exchange this week as 58,800 head in 14 lots changed hands at prices of 17 4 to 19 0 Almost half the sales were at 17.5 and 20 per cent more brought 17 6.

All broilers on offer were sold but growers refused bids of 19 to 22 1 for 20,325 heavier birds in 10 lots. Only two lots, including 2,300 head of pullets were sold at 28 8 and 29, and only one lot of 750 roasters sold at 25 cents One lot of heavy fowl brought 16 6 for the 500 head and one lot of 1,200 legnorn brought 10 2

The complete sale offered 83,875 head in 30 lots and sold 63 550 head in 19 lots

Following is the complete sale report with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price

● Delmarva-Georgia

Prices Range Downward

Delmarva reported prices of 16 4 to 17 9 for 761 100 head at farms during the 24 hour period ending 10 30 Friday morning These prices were approximately ½ cent lower than the previous 24 hour period

Moderate offerings met a fair demand with very few dressing plants in the Delmarva area operating on Saturday Estimated Slaughter by Eastern Shore Processors for the week end was 696,000 head compared to the 637,000 head last week end

The Delmarva broiler-feed ratio for the week ending March 9 was down three points from the previous week at 4 0 Broilers averaged 18 25 per pound and 20 per cent mash cost the grower $91 42 per ton

The ratio for the comparable year-ago week was 3 7 when broilers averaged 17 47 per pound and mash cost the grower $93 10 per ton

Fluid Milk Production Still Goes Up

All areas reported slightly increased production of fluid milk

In the south supplies were adequate to generally ample with a good balance, although slightly short of ice cream needs in some instances

In other areas offerings were heavy and often in excess of needs

Wholesale selling price in New York ranged $4 90-4 95 mostly $4 95 per 10 quart unit Occasional distressed sales were at $4 85

From Where We Stand . . .
Force Ourselves To Help Ourselves

A few nights ago we had to get a little rough with the older boy to get him to bed at the prescribed time

After a little coercion, he reluctantly went on up the stairs.

Then the better half of our marriage said, "Why should you have to force a child to do things that are good for him?"

It would appear that he could see the necessity for going to bed at the proper time and getting the necessary rest, but he didn't appear to be able to see it.

We were reminded of the incident a few days later when a veterinarian told Lancaster County Farmers they have not been doing a very good job in the fight to control a dread cattle disease

And to make the situation worse, the disease can be transmitted to human beings as well

Now the pathetic part of the whole picture is this A few years ago the disease was almost totally eradicated, but through neglect it is staging a comeback

Tuberculosis has been called the disease of civilization since it is as old as civilization itself and was unknown in many aboriginal tribes before civilization came to them

For many generations the word Tuberculosis struck fear into the hearts of mankind because there was no known cure for the "white sickness"

For many years dairymen and cattle breeders made real progress toward conquering the disease — partly because of that fear

But with the advance of the wonder drugs, Tuberculosis does not hold mankind in the grip of fear as it once did

Partly because of this farmers have become careless or apathetic about the problem They no longer seem to feel this is a disase which must be fought to eradication

Farmers have the know-how and the facilities for wiping this disease out of every herd of cattle in the Commonwealth

We know this is true because figures show that the disease was almost non-existant six years ago before it began a comeback

Dr Samuel Guss, extension veterinarian from the Pennsylvania State University said that reported cases of Bovine Tuberculosis in Pennsylvania have quadrupled in a two year period

He says we must make up our minds to get busy and eradicate the disease completely

We agree with Dr Guss We think it is time farmers forced laws and enforcement of those laws upon themselves, because without force we sometimes will not do the things we know are good for us.

At least that's how it looks from where we stand

National Egg Monih

This year for the ninth consecutive year, National Egg Month is being observed

Sponsored by the Poultry and Egg National Board, the purpose of the month-long observance is to promote the use of eggs and to move more eggs from farm to family table

We believe this is a worthy undertaking We believe a campaign to bring to the consuming public the truth about the wholesomness of farm-fresh foods is always in order There is too often publicity of the other kind, and the truth about the good in food is told too seldom and too hap-hazardly

The theme of National Egg Month this year is "Eggs For Get Up and Go."

We propose this as a theme for promoting all agricultural products — and the sooner the better

At least that's how it looks from where we stand

We've Just Got To Get Organized

One of these days we are going to have to get organized

We keep telling ourselves that, but sometimes something happens to make us wonder if we aren't just about as organized as we are going to get

We have just about come to the conclusion that we work in the ulcer department of an ulcer business in an ulcer world, and the only thing to do is pitch in and enjoy it

Every time we think we have things under control and everything is in its proper groove, something comes along to gouge a new groove Every time we think it is going to be smooth sailing from here on out, someone stands up and begins rocking the boat Every time we think we have the fire out, someone comes rushing in with a bucket of high octane gasoline

So we just have to keep shoving things back into the old groove, trimming the sail, and reeling out more hose, and who could get things done with all that ruckus going on at one time

But one of these days we are going to have to get organized

At least that's how it looks from where we stand

"Cornfusion" Reigns In Seed Boxes

A state of 'cornfusion' may exist among farmers when it comes to selecting seed corn for planting, a survey indicates at the Pennsylvania State University The study made in 1961 shows that 112 farmers in Central Pennsylvania planted 147 different field corn hybrids

Of the 147 hybrids used 20 were early maturing varieties reports Harold C Campbell graduate assistant with the project at Penn State Another 56 hybrids were well selected for the regions medium length growing season and 56 were more suited to areas with longer growing seasons

The average farmer in the survey was planting four varieties of hybrid field corn from two different 'brands," says Campbell

Past field performance was given as the major reason for selecting a hybrid Fifty-two per cent of the farmers reported trouble with stalk breakage and soft corn

The 147 hybrids' were furnished by 14 seed companies Thirty varieties each planted on 25 or more acres, made up 71 per cent of the total acreage Six per cent did not remember the variety planted The other 117 varieties made up the remaining 23 per cent of the acreage

Open-pedigree corn, such as the hybrids developed by the Agricultural Experiment Station at Penn State made up 26 per cent of the total crop

Campbell points out that lists of outstanding Experiment Station hybrids for each region are available from county agricultural agents

Human Hogs

Lesson for March 18, 1962

"COVET" is a word that doesn't sound sinful It is often used in perfectly respectable connections, as when the King James translation of I Cor 12 31 has Paul saying "Covet earnestly the best gifts" Coveting in the Tenth Commandment, however, does not mean simply to desire It is not itself a sin to desire to have some thing All human effort indeed human life itself, would grind to a stop if nobody ever wanted any thing It is not a sin to want what someone else has, if he is willing to let you own it and if you pay him a fair price

Dr. Foreman

What is greed?

Nevertheless greed is a sin and *greed is a simple one syllable* word that means covetousness but sounds ugly too, like what it stands for If you have ever fed pigs you must have noticed how they act at the trough All the hog needs is just get his mouth into it, but that's not enough for him He wants to put both feet and most of his face into it He doesn't care what the other hogs do, he's strictly out for his own appetite It may be unfair to hogs (for this writer has seen cats which were just as greedy as any hog) but the words **hog** and **hoggishness** are used of human beings sometimes, but never as a compliment'

Now, what is to be greedy? As was said just now, merely **wanting** something is not necessarily greedy Greed is wanting **more than my share, more than I need. Getting** more than one's share, more than one needs, is not greed The greed comes first, it is wanting gone wild, it is wanting without a particle of love

"... and I intend to squeeze it"

A distinguished critic being asked some years ago to give his philosophy of life, responded, "The world is my orange, and I intend to squeeze it." The man has been converted since then, it is said, but as he was then, he was making as frank a profession of greed as a man could make He revealed in that one sentence two facts 1 The greedy man thinks he has a claim to everything in sight, and if he sets his sights high enough he can even think the whole world is his orange. 2 The greedy man lets nothing stand in his way Police departments all over the world know the connection between greed and murder More people are killed from motives of greed than from hatred Greed unchecked runs up like a poison plant into every kind of crime

Two kinds of human hog

The human hog comes in two main varieties One is the plain or backlot variety What he wants are things, and he can go on piling up things to the day of his death, like the farmer in Jesus' story without giving proper thought to what he can do with what he has, in short with no real reason except to make the pile bigger Men who get out their money boxes every night and count the coins used to be called misers It would be hard to find men like that today, but the miser is still with us Every time there is an election to raise taxes for schools there are people who will vote NO simply because they have no children and don't want to be taxed to help other peoples children Some people collect money some collect trash, but if you've no plan to spend the money wisely and generously, you might as well collect junk

Hogs of all sorts

The other main variety of this kind of man is the kind that hogs something besides money Some people hog the limelight, they want to be the center of every scene and they don't relish "scene-stealers," some hog notice in the newspapers, and will die in bed holding an old album of press notices Some are gluttons for power, James and John were men of this sort before association with Jesus finally changed them. They wanted to share the authority of Christ, they have their counterpart in every church, men and sometimes women who must 'run" the church or they are not satisfied Other people hog attention, others want the largest share of the credit for any good change even if they actually fought it when first it was suggested Whatever it may be, if any person wants something so much that he doesn't care what he does to get it, he is not only ridiculous, he is a danger to all the rest of us

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U S A Released by Community Press Service)

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

TO PUSH EARLY PASTURE

Many livestock men are anxious to get their herds out on grass as early as possible; an application of nitrogen fertilizer at the rate of 30 to 40 pounds of actual nitrogen per acre during late March or early April will push the growth of the grass, this application should only be made to a part of the pasture area (about ¼-acre per animal) unit otherwise there may be too much forage early in the spring for the animals to consume

TO CHECK SEED AND FERTILIZER SUPPLIES . . . . Spring planting time will be at hand in a few weeks, farmers are urged to get their supplies on hand of the quantity and quality desired so there will not be any delay at planting time. Seed suppliers are often too low for the demand and then growers accept a less desirable variety in order to get their work done in time

TO SPRAY FRUIT TREES . . . The first sprays of many varieties of fruit trees should be applied very soon, growers are urged to obtain the needed information and follow the spray schedules very closely Clean fruit requires a regular spray schedule during the growing season

TO SPRAY FOR WILD GARLIC . . . Dairymen are urged to wage an all-out war on wild garlic in their pasture fields, this weed will cause off flavor in the milk supply if not properly handled Spray with the ester form of 2,4-D at the rate of one to one-and-a-half pounds per acre during mid to late March

(Continued on page 5)

● Now Is The Time

(Continued from Page 1)

TO BUY DISEASE RESISTANT TOBACCO SEED . . . Local growers are urged to recognize the value of the two new varieties of tobacco released last spring both the Pennbel and the Pennleaf are resistant to wildfire and the Pennbel also resistant to mosiac to have this resistance in the seed is one of the best ways of getting rid of these disease problems Other qualities of these two varieties are such that they are worthy of more acreage each year

● Pest Control

(Continued from Page 1)

The what-to-use, when and how of application for maximum effectiveness will be emphasized throughout the discussions, Lueck said

The extension specialists will address themselves mainly to problems with field corn forage crops tobacco beds potatoes and tomatoes, lawns and ornamental plants

The evening program normally held at the same time as the annual spring spray meetings will be cancelled this year, but all farmers and custom spray operators are invited to attend the all day session Lueck said

Program for the day is as follows

9 30 a m — Insect Control J O Pepper extension entomologist

10 30 a m — Controlling plant diseases Herbert Cole Jr , Plant Pathologist

11 30 a m - 1 p m — Lunch

1 p m — Weed control measures, George Berggren extension agronomist

2 p m — Equipment To Do The Job Ralph Patterson Agriculture Engineer

3 - 3 p m — Discussion Consultation and adjournment

Wool Payment Program Ends On April First

The 1961 wool program incentive payments to be made this summer will cover only wool and unshorn lambs which are marketed before March 31, 1962 Fred G Seldomridge Chairman of the Lancaster County Agricultural Stabilization and Conservation Committee, reminded growers today

That is the closing date for the 1961 program, which extends from April 1, 1961 to March 31 1962 Growers will have 30 days after the closing date in which to file their applications for the payment

Payments to producers for the 1961 marketing year will follow the same methods used in previous years Shorn wool payments will be equal to a percentage of each producers cash returns from wool sale The percentage — to be announced later — will be that required to raise the national average price received by all producers for shorn wool during the marketing year up to the incentive price of 62 cents per pound

Lamb payments will be made to each producer who sells lambs that have never been shorn The payments will be at a rate per hundredweight of live animals marketed to compensate for the wool on them on a basis comparable to the national average incentive payment per pound of shorn wool

The Chairman emphasized the importance of keeping adequate records on sales, which must support the information on payment applications Thus, producers sales records for shorn wool should show name and address of buyer date of sale name and address of producer net weight of wool sold, and net proceeds to producer after normal marketing deductions

Best Food Buys

Prices Change With The Weather

Good food buys are just about as tough to predict as the weather during the Month of March Changing seasonal weather patterns depletion of storage stocks of certain commodities and the observance of Lent are important factors influencing availability of foods and the retailers promotional decisions Foodshoppers would do well to study the food ads in local newspapers before doing the shopping this weekend, reminds Tom Piper, Penn State Extension Marketing Agent

Beef steaks, pork roasts, center - cut pork chops and frozen turkeys are meat items due to appear on the list of value priced items at many markets Observance of 'Fish and Seafood Time' is now underway Watch for promotionally priced seafood items as frozen fillets of cod, flounder, haddock, and ocean perch are reported in heavy supply

Eggs are in plentiful supply at prices below a year ago Large size eggs offer best value on a weight basis A large number of types and forms of cheese are available to add variety to meatless meals

Protein-wise, nutritionists say you can substitute Cheddar or process cheese ounce-for-ounce for most lean meats Both eggs and cheese provide an economical source of protein

Adverse weather conditions in the west last week are responsible for the light supplies of some fresh vegetables This situation has caused marked increases in the price for celery and cabbage Lettuce quality is reported to be fair to poor as a result of recent freezes in important growing areas Cucumbers, peppers, eggplant, broccoli, and Brussel sprouts are in light supply and prices are holding firm.

Potatoes are still the outstanding buy in fresh vegetables Green beans, endive, escarole, spinach, radishes, leafy greens and green onions are reasonably priced

Grapefruit, oranges and apples continue to dominate the buyers choice of fresh fruits Red and Golden Delicious, Stayman and Rome apples continue to move well at unchanged prices Grapefruit quality is now at its peak and lower prices are noted on the heavier shipments of Valencia oranges Avocados are approaching a peak supply situation and will provide 'something different' for dessert Banana prices are currently high due to light supplies

Farm Women 22 Entertain Guests At County Home

Members of Society of Farm Women 22 plan to entertain guests at the Lancaster County Home on Thursday, March 22 Plans were made at the recent meeting in the home of Mrs Willis Rohrer, Smoketown

Mrs Clarence Rohrer was co-hostess The hostess was in charge of devotions. Roll call was answered by each member giving a good recipe. A food sale was a feature of the program

Members of Society 22 will be the guests of society four at 2 p m, March 31 at the Farmdale School.

The next meeting of Society 22 will be held Tuesday, April 10 at the home of Mrs Paul Miller, 1719 Windy Hill Road. Mrs John Neff will be co-hostess.

Farm Women 13 Hear Co-Pres.

Mrs Ben Myers, President of the county association of Farm Women's Societies was the speaker at the recent meeting of society 13

The regular monthly meeting of the group was held in the Farm Bureau Cooperative building, Dillerville Road, Lancaster

Members of society eight were guests About 50 were in attendance.

The next meeting of the society will be held April 13

Los Angeles County, California, leads all counties in the United States in the number of milk cows and in the volume of whole milk consumed

Miller and Bushong Increases Bulk Feed Handling Machinery

Contracts have been let by Miller & Bushong, Inc , Rohrerstown, Lancaster County, Pennsylvania, for a second bulk finished feed loading station It will consist of 18 bulk feed bins of varying capacity for a total of 320 tons with its own traveling overhead scale

Over-all height of the structure will be 78 feet from the ground to the top of the 18-hole, electric turnhead.

This will bring the total bulk load-out facilities to approximately 600 tons The new station will enable Miller & Bushong to take care of expanding sales, increase in-plant efficiency and assure continued prompt service to their clients

Sprout Waldron of Muncy, Pennsylvania is the prime contractor Construction will start immediately

A bird has to live to lay. . and New Ames birds are famous for their high livability. The results of hundreds of flock records show Ames In-Cross birds average 88 to 95% livability Many individual flocks show 97 to 98% livability under good management conditions.

Layability is important too! These same flock records and Random Sample Tests show New Ames layers peak at 92% to 95% and lay longer For instance, one flock's production record showed 90% production at 6 months, a peak of 98% the 7th month, and 92% the 8th month And, every 3.46 lbs of feed they consumed produced a dozen eggs The same poultryman reports an older flock laying 75% after 11 months of lay!

You'll house more layers. case more eggs with New Ames chicks See us right away for all the facts and your free Ames In-Cross catalog Stop in . we're in business to serve you .

Prune Shrubs After Blooms

Shearing and clipping are good practices to use on a French poodle, but not on most ornamental plants say extension horticulturists.

Although there are some exceptions such as hedges pruning of ornamentals should preserve the natural shape of the shrub or tree, rather than make it symmetrical This is accomplished by cutting back some of the branches, removing dead, diseased, weak, and broken branches, thinning out over-crowded areas, and by removing old branches of shrubs at ground level This is more time-consuming than shearing, but the results improve flowering, beauty and the general health of the plant.

There is a proper time of year to prune each type of shrub or tree to get good flowers and keep the ornamental in good health Shade trees should be pruned right now unless the buds have started to swell greatly Other plants that may be pruned now or in early spring include evergreens and late flowering shrubs — those that bloom in late June, July and August Early bloomers — those flowering in March, April, May and early June — should be pruned immediately after flowering.

For more information on pruning, contact your county agricultural agent He has leaflets on pruning different types of plants

Tree Seedlings Need Care

Tree seedlings must be kept moist from the time they leave the nursery until they are planted explains E P Farland, Penn State extension forester He emphasizes that a good root system is essential to successful plantings, so if the roots dry out rapidly they will be injured

Hog Show

(Continued from Page 1)

the litter, but he does still have three gilts which he plans to add to his herd.

"Both the grandsire and great grandsire of the champion are Certified Meat Type boars," he said.

At the sale in the afternoon, Kunzler and Company, Inc of Lancaster paid top price of 70 cents per pound for the champion The two other hogs in the reserve champion trio (with the champion out) sold to the packing firm of E W. Martin Company, Lancaster, for 23 50 per Cwt They averaged 185 pounds each

The champion pen of three went to Abrogast and Bastion, Allentown, for 25 cents a pound They averaged 193 pounds

Kunzler also bought the champion pen of ten at 20 cents a pound as well as 36 other hogs for a total of $2,050 for the 47 head

Biggest buyer in the sale was the Lancaster firm of E W Martin and Co Old Philadelphia Pike Martin took 57 of the porkers for a total of $2,118 60

Weiland Packing Co, Phoenixville, bought 45 head for a total of $1,618 64 and Abrogast and Bastion took 42 head at $1,613 48 Hervitz Packing Company of Harrisburg paid a total of $1,591 for 10 head, while Fisher Brothers of Bridgeton N J bought 26 head for $937 68

Other buyers, the number of head and total paid are Phares Longenecker, Middletown, 13 $415 09 A B Hollinger, Lancaster nine, $356 28 Leon Thomas, Willow Street, eight, $337 17 Paul Stoltfus, Bird-in-Hand three, $109 25 and J P Wartel Lancaster eight $329 65

Samuel Hippey Willow Street R1, buyer of all the champions in last year's show was absent on Wednesday Last year Hippey paid $2 70 per pound, the highest price on record, for one lot of 10 Hampshires

The 297 hogs in the show averaged 203 pounds for a total of 60,410 pounds and $11,513 57. The sale average of 19.06 was reported to be about 1.25 over the day's market price for comparable hogs Twenty five Producers exhibited hogs in the show

The show was sponsored by the Lancaster County Swine sale was conducted by the Producers Association and the Lancaster Livestock Exchange. Abe Diffenbach was the auctioneer.

Other placings in the show were as follows

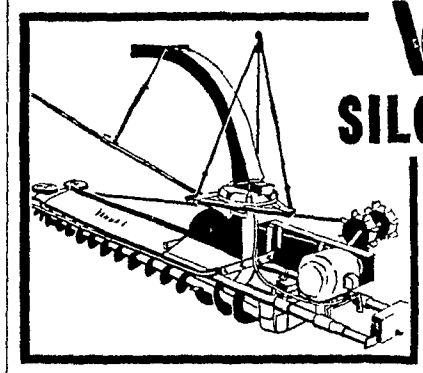
Complete automatic feeding for DAIRY COWS and CATTLE!

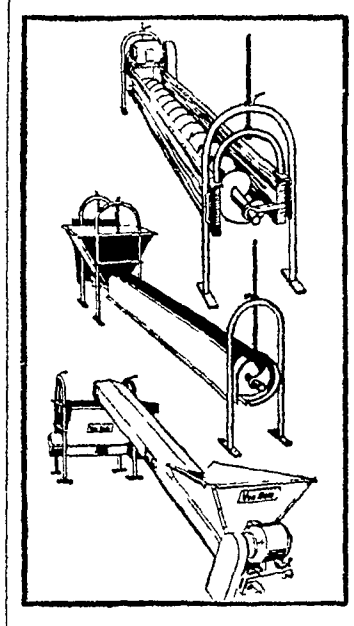
VanDale SILO UNLOADERS



Double augers deliver more silage per minute even when silage is deeply frozen . . and at a lower operating cost Patented V-paddle impellers *throw* . not blow . . silage down chute. Adjustable drive hubs give positive traction in all types of silage

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 10', high capacity 9" auger. Additional auger sections are in 10' units and are easily coupled

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder High capacity 9" auger rotates within tube Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder Primary section includes hopper, drive assembly, and 10, 9" auger. Additional 10 auger sections may be added.

See us for modern automatic feeding equipment

Farmers Urged To Inspect Seed Bag Tags

HARRISBURG — With the Spring planting season about to open the State Department of Agriculture today reminded farmers and home gardeners to check seed labels and tags before making purchases

Dr Thomas L Guyton director of the Department's Bureau of Plant Industry offered this advice to seed buyers

"Reading and studying the analysis tag is the only sure way to obtain a reasonably accurate idea of the value of a lot of seed The tag will tell you what percentage of pure seed is contained what percentage is alive and capable of vigorous growth and whether the seed is free of prohibited and noxious weeds

The Pennsylvania Seed Act requires that all agricultural and vegetable seed including lawn grass mixtures offered or exposed for sale must bear tags or labels showing the contents of the mixture Seed vendors are responsible for such labeling regardless of the size of lot or containers

Plant Industry inspectors are currently visiting seed vendors throughout the state for purposes of taking seed samples These are analyzed in the Bureau laboratory to determine whether the seed complies with the information given on the label

Dr Guyton further advised users of seed to be on guard against door-to-door salesmen offering seed of questionable variety and again reminded prospective buyers to read the test tag

---

Nitrogen applied to bluegrass pasture before the grass begins to grow will give it a running start, declares Wayne Hinish, Penn State extension agronomist He says bluegrass treated with nitrogen will be ready for pasturing about two weeks either than grass not so fertilized

22 COWS SELL AT NEW HOLLAND R2

Twenty two cows sold at prices of $165 to $430 at the public sale of Jeremiah Martin at New Holland R2, Tuesday

"THE DEALER WITH A HEART"

720 N. PRINCE ST, LANCASTER, PA.

● Minimum Tillage

(Continued from Page 16)

the preceeding crop or the soil type had much influence on the yields that could be expected "In fact, in the heavy clay soils which some people believe are not at all suited to minimum tillage, the increased yields were the most apparent" he concluded

Not only were yields increased, but much evidence pointed to a considerable increase in the water holding capacity of the soil with minimum tillage This is a result of the increased absorption of available water and a decrease in evaporation from the cloddy soil

There is evidence that weed control problems can be reduced by Minimum Tillage but contrary to popular belief, it does not remove the need for weed control

One of the advantages often overlooked is soil temperatures, McGahen believes With minimum tillage, he believes corn can be planted earlier and thus offset the difference in time for the minimum tillage corn to come up

McGahen makes the following recommendations to farmers thinking of using the method of corn cultivation

1 A good job of plowing is essential

2. Timing of plowing according to moisture conditions

3 Proper selection and adjustment of planting equipment is probably more critical than with conventional planting

4 Planting should be completed as soon after plowing as the particular soil permits Determined by the time it takes the soil to dry enough that it does not stick and gum up the planter

5 Seeding depth should be controlled by a depth gauge The proper depth (1-½ — 3 inches) should be determined by the soil type moisture and soil temperature

6 The need for cultivation as always will be determined by the severity of the weed problem

Minimum tillage is not a fool-proof, cure-all operation Each field operation must be performed carefully

Disadvantages listed by McGahen are as follows

1 More skill and knowledge of soil conditions, equipment and adjustments are essential

2 Plowing and planting must be completed in a short time

3 Depending on the method used, it may require one piece of equipment for tillage and another for planting

4 Undesirable appearance of the field, as measured against our present concept of the appearance of an ideal seed-bed

Buy Best Seed

Farmers who plan to buy seed are reminded of two important facts by Clarence Bryner, Penn State extension agronomist select varieties tested and proven superior in Pennsylvania, and then buy high-quality seed of those varieties

● Lititz 4-H

(From Page 1)

leaders are Mrs W Dean Fyock, Lititz R1, Mahlon Kreider, Manheim R1, Mr and Mrs. Clayton Sangrey, Lititz R2, and Mr and Mrs Melvin Long, Lititz R3.

Victor Plastow, assistant county agent, was present, he opened the meeting and gave membership cards Thirty five attended the meeting and refreshments were served by the adult leaders

The next meeting will be held April 5th at 7 30 p m. at the Fairland School

Have you ever had it so good? And had it taken away from you so cockeyed fast?

Minimum Tillage Corn Planting Studied By County Agri. Teacher

The advantages of "Minimum Tillage" for corn are not in higher yields but in time saved, reduction of production costs, lessening of soil compaction and erosion weed control and soil temperature changes according to Joseph McGahen a teacher of vocational agriculture at Manheim Central High School

McGahen on a years leave of absence from the high school last week presented a paper during a seminar at the Pennsylvania State University in which he pointed out the advantages of working corn ground is little as possible

In his presentation McGahen said Strictly speaking minimum tillage means the use of the fewest possible number of field operations to prepare the soil for planting seeds A reduction in the number of trips over a field in preparing a seedbed will obviously save time labor and production costs But the question remains will these savings be offset by a reduction in yield?

McGahen's paper titled 'Minimum Tillage For Corn' undertook to answer this question as well as how important the other benefits really are Are the advantages of improved soil structure and soil and water conservation reduced weed control problems and increased soil temperatures gained with minimum tillage enough to overcome the disadvantages

McGahen said his interest in the problem stemmed from the growing concern in the factors which seemed to be limiting yields plus the efficiency aspects of minimum tillage

He cited research data from all 48 states which showed the greatest limiting factor in corn yields as low fertility which accounted for limiting production in 16 per cent of the projects Rainfall was the limiting factor in 14 per cent of the cases and plant population figured in reduced yields in 13 per cent of the trials

In fourth position in the list of limiting factors was poor cultural practices which was a factor in 11 7 per cent of the research plots

Poor fertility can be corrected by soil testing and application of fertilizer Rainfall can be supplemented by irrigation, and plant population can be adjusted easily

Tillage is one of the poor cultural practices contributing to lowered yields, McGahen said

He listed five types of minimum tillage studied

1 Limited, plowing followed by not more than one discing or harrowing and one cultivation

2 Wheel track planting no tillage after plowing, (a) tractor wheels make the seedbed (b) planter wheels make the seedbed

3 Plow plant planter is usually attached to the plow packer wheels of the planter make the seedbed

4 Mulch tillage field is disced or chisled and then planted

5 Till planter consists of a set of shallow sweeps deep sweeps a rotary hoe and a planter unit

McGahen, citing work he had done at Manheim as well as the work of other researchers in many parts of the nation concluded that "Much of the prevailing secondary seedbed preparation appeared to be not only wasteful of time and power, but actually from the standpoint of corn yields' Plowing at least once during a four year rotation resulted in higher yields than preparing all rotations with mulch tillage

In two thirds of the tests, he found, minimum tillage yields were greater Neither

SPECIAL PLAQUES WERE AWARDED to the Outstanding Conservation Farmer and the Outstanding Associate Director of the Soil Conservation District at the district's annual banquet Monday night Looking on, far left, is David Unger, Director of the state Soil Conservation Service, main speaker of the evening as County Commissioner, Richard Witmer, second from left, presents the award to Abram S Zeiset, East Earl R1, as the Outstanding Conservation Farmer Right is Harry Troop, Quarryville R3, Outstanding Associate District Director

Soil Conservation Cuts Road Maintenance Costs

It costs 16 times as much to maintain roads in an area where farmers do not use conservation practices Lancaster County conservation farmers were told Monday night at the annual banquet of the Soil Conservation District banquet in Quarryville

Some 250 farmers and their wives heard David Unger Director of the Soil Conservation Service of the Pennsylvania Department of Agriculture say "In one area of York County highway supervisors kept detailed records and found that it cost 16 times as much in taxes to maintain roads in areas without conservation practices on the farms as compared to the areas where conservation practices are common

Unger said there were 9 000 new faces at the breakfast table that were not there yesterday morning and tomorrow there will be that many more He said we add a city the size of Chicago to our landscape in America every year

With this tremendous growth he pointed out we must look to our potential production to make sure the future generations have an adequate supply of food

"The answer is simple" he said "Just apply soil conservation practices to the land

But the job is not so simple he explained because it involves working with people, and there is never any compulsion put on the farmer to use conservation practices

Many farmers are hesitant to sign an agreement because they believe it will bind them to perform whatever practices the Soil Conservation Service tells them to do

This is not the case he said There is no compulsion to follow the conservation plan even after the agreement has been signed The agreement states that either party can terminate the agreement in writing at any time

He said Pennsylvania has more contour strips than any other Northeastern state but too many people think that is all there is to conservation He went on to show slides of all the many phases of conservation of soil water forests fish and wildlife

Amos Funk, chairman of the district board, outlined the need for keeping the county agricultural and cooperating with the urban resident in planning conservation programs

"I can see a time when we might want to have a city man sit on the board and discuss our mutual problems" he said.

County Commissioner, Richard Witmer, presented citations for cooperation with the district to Forney Longenecker an associate district direct-

For the Farm Wife and Family

Delightful Desserts

By Mrs Richard C. Spence

The welcome mat is always out and one way to enjoy entertaining is to have coffee and dessert

Even if your schedule is hectic these elegant desserts can be prepared in the morning and enjoyed later that evening in the congenial atmosphere of friends and family

FUDGE WEDGES

1 4-ounce can flaked coconut
1 6-ounce package semi-sweet chocolate pieces
3 tablespoons light corn syrup
2-½ cups sifted confectioners sugar
1 cup chopped walnuts
½ cup orange juice
1-½ cups graham cracker crumbs finely rolled

Sprinkle ½ of the flaked coconut over bottom of a 9-inch pie plate Melt chocolate pieces over hot water Add remaining ingredients except flaked coconut and mix well Turn into coconut lined pie plate Sprinkle remaining coconut over top and press down gently Chill Cut into thin wedges Makes 14 to 16 wedges

* * *

MOCHA SOUFFLE

2 envelopes unflavored gelatine
½ cup sugar
¼ teaspoon salt
2 tablespoons instant coffee
1 cup water
1 cup milk
3 egg yolks slightly beaten
1 teaspoon vanilla extract
3 egg whites
1 cup heavy cream
½ cup chopped walnuts

Combine gelatine sugar salt coffee water and milk in top of double boiler over boiling water Heat until mixture is scalded and gelatine is dissolved Add slightly beaten egg yolks and cook 8 minutes Remove from heat Stir in vanilla and chill until syrupy Fold in stiffly beaten egg whites Whip heavy cream Reserve half for garnish Fold in remaining cream and walnuts Pour into individual sherbet glasses Chill until firm Garnish with reserved whipped cream Makes 6 to 8 servings

* * * *

Are you one of those people who likes to keep your candy dish filled with fudge? Fill it up next time with this fudge

QUICK PENUCHE

Medium

½ cup butter or margarine
1 cup dark brown sugar
¼ cup milk
2-cups sifted confectioners' sugar
1 cup chopped pecans

Melt butter and add brown sugar cook over low heat about two minutes stir constantly add milk cook, stirring constantly until mixture boils remove from heat cool Add confectioners' sugar gradually beating until mixture is consistency of fudge Add nuts Drop fudge in pans refrigerate

Light

Substitute one cup granulated sugar for dark brown Substitute one cup slivered almonds for chopped pecans. Add ¼ teaspoon almond extract

Dark

Substitute one cup light brown sugar for dark brown Substitute one cup chopped walnuts for chopped pecans Add ¼ cup cocoa

* * *

In this recipe chunky pieces of fruit set in sparkling gelatin provide a pleasing contrast to layers of spiced crumbs made with graham crackers

FRUIT LOAF

1-2/3 cups graham cracker crumbs, finely rolled
½ cup brown sugar
½ cup chopped walnuts
1 teaspoon cinnamon
3 tablespoons butter or margarine softened
1 3-ounce package lemon-flavored gelatin
1 cup hot water
2 1-pound jars fruits for salad well-drained
1 large ripe banana sliced

Combine graham cracker crumbs with next four ingredients Spread ⅓ of this mixture in the bottom of a 9x5x3-inch loaf pan Dissolve lemon-flavored gelatin in hot water Chill until syrupy. Stir in fruit Spread half of fruit mixture over crumbs. Repeat layers and top with remaining crumbs Chill until set Just before serving, garnish with whipped cream Makes 6 to 8 servings

* * *

This peppermint log is a many-layered peppermint delight — dramatic at serving time but simple to prepare. Make one for the freezer and be prepared for unexpected guests

PEPPERMINT LOG

4 ounces chocolate covered thin mints (10 1-½x¼-inch round mints)
20 to 22 square graham crackers
1 cup heavy cream
¼ cup confectioners' sugar

Melt chocolate covered mints over hot water Spread a thin layer on each square graham cracker Whip cream with confectioners' sugar Spread frosted graham crackers with ½ of the whipped cream Put together in stacks of 4 or 5 Freeze until cream is set Lay

stacks end to end, forming a log. Spread remaining cream over top and sides of log *Chill To* serve, slice diagonally Makes 6 to 8 servings

* * *

A dessert favorite with many people is pecan pie You may want to try this recipe which is served every Friday in the cafeteria of the Department of Agriculture in Washington D C This recipe has been used in the cafeteria for 25 years, many people take pecan pies home regularly from the bakery sales room

This recipe makes just enough filling for a 10-inch pie or two 7-inch pies The head baker, Mrs Sophia Douglas, has found that using shallow pans of these sizes is just about right A deep filling makes the pie too rich for most people If you have to use a 9-inch pie pan, pour in a shallow layer of filling and use the rest for a couple of tarts

PECAN PIE

4 eggs
1 cup granulated sugar
Pinch of salt
2 tablespoons plus 1 teaspoon melted butter
1 teaspoon vanilla
1-½ cups dark corn sirup
1 cup of pecan halves or pieces
Unbaked pastry shell,
one 10-inch or
two 7-inch or
one 9-inch and tarts

Preheat oven to 350 degrees Beat eggs just until blended but not frothy Add sugar salt, and corn sirup Last add cooled melted butter and vanilla Mix just enough to blend Spread nuts in bottom of pie shell Pour in filling Place filled pies in oven Then turn temperature setting back to 325 degrees and bake 50 to 60 minutes until set

* * *

RICH CHERRY SHORTCAKE

Shortcake

¼ cup shortening
2 cups sifted flour
3 teaspoons baking powder
2 tablespoons sugar
½ teaspoon salt
1 egg
½ cup milk (about)

Sift together dry ingredients Cut the shortening into the flour with a pastry blender until the mixture is the consistency of corn meal Break egg into a measuring cup Add enough milk to measure ¾ cup Stir well Add to dry ingredients and blend until a soft dough is formed Turn onto a lightly floured board Knead 10 times Place in an 8-inch round cake pan Pat to fit pan Bake in a very hot oven (450 degrees) about 20 minutes

Filling

8-ounce package cream cheese
1 tablespoon milk
2 tablespoons powdered sugar

Cream ingredients together until smooth Spread on shortcake as directed beow

Cherry Sauce

2 cans (1 pound each) unsweetened pie cherries
2 cups sugar
5 tablespoons cornstarch
3 tablespoons butter or margarine
1 tablespoon lemon juice
½ teaspoon salt

Drain cherries. Set aside ½ cup juice Bring remaining juice and sugar to a boil Moisten cornstarch with the ½ cup juice and stir into boiling sugar and juice mixture Cook until clear Blend in cherries, butter lemon juice and salt Cool To serve, split shortcake through center to make 2 layers Spread bottom half of shortcake with cream cheese filling Spoon half of the cherry sauce over the cheese Top with remaining half of shortcake Spoon remaining cherry sauce over all Top with whipped cream, if desired Cut into wedges to sherbet glasses

* * *

Fluffy Pastel Snow Squares coated with graham cracker crumbs and served with a smooth rich sauce make a simple but dramatic dessert Serve them in tall delicate sherbert glasses

PASTEL SNOW SQUARES

1 3-ounce package strawberry-flavored gelatin
1-½ cups hot water
3 egg whites
¼ teaspoon salt
3 egg yolks
½ cup sugar
½ cup melted butter or margarine
1 tablespoon grated lemon rind
1 tablespoon lemon juice
½ cup heavy cream whipped
1 cup graham cracker crumbs finely rolled (about 12)

Dissolve gelatin in hot water Chill until thick and syrupy Beat egg whites with salt until stiff but not dry Fold into gelatin Turn into a 9-inch square pan Chill until firm Cut gelatin into squares Roll each square in graham cracker crumbs Pile in sherbet glasses and top with sauce

Sauce Beat egg yolks until thick and lemon-colored gradually adding sugar Blend in melted butter grated lemon rind and lemon juice Fold in whipped cream Chill about 1 hour Makes 6 servings For variety make recipe using different flavors of gelatin and mix the colors in each serving

CAN YOU FILL IN THE MISSING WORD?

The answer should be easy because some things just naturally go together.

Take electricity for example. It just naturally goes with comfort, convenience and a low-cost way of getting things done. That's why electricity and better living go hand-in-hand . . . to make it the biggest bargain in your family budget today.

P. B. GUERNSEY SALE
THURSDAY, MARCH 22, 1962 — 12 30 NOON
At the Ass'n. Sales Pavilion 6 Miles East of Lancaster, Pa., on Rt. #30.
48 HEAD - 25 COWS AND 23 BRED HEIFERS'
Vaccinated - Dehorned - T. B. & Bangs' Cert.
All fresh or due within 30 days of Sale date.

It is always easier for us to get real top cows for early Spring Sales than any other time of the year.

We had a nice choice of offerings of which we only selected the kind that will really shell out the milk and have the potential of foundation caliber.

We come again with some top consignments from Windy Hill Farms, Titusville which has established an enviable reputation for outstanding consignments. Harry Blessing, Wrightsville gave us our choice of 4 tops.

These and many others with production well over the breed average.

Come and buy at bargain prices

Here's what users say:

Lebanon County: William Myer, Myerstown, R.D. — 93 cow herd—"We have noticed a steady improvement in our production and butterfat since we are on your program."

Lancaster County: Jacob Harnish, Manheim R.D. — I am really well pleased with your program. I started it in the spring of 1961. My D.H.I.A. records show that my cows are averaging about 800 lbs. more milk and are also doing much better on butterfat test.
